

Rebanks Pepper Littlewood Architects Inc. - Police & Public Safety Consultants

Police Facility Architects & Planners - Needs Assessments & Functional Programming - Security Systems and Safety Planning

Police & Emergency Services Specialists Since 1980

Rebanks provide design, programming, operational planning, security and technical services. We lead the planning and design phases, and provide local architects with construction documents for detention and evidence areas, training facilities, communications, security systems and other speciality areas.

"...about the most state-of-the-art in the United States"

Gen. Barry McCaffrey - Director of National Drug Control Policy, 5/97

Need a New Building?

Our Needs Assessments, Functional Programming and Strategic Planning studies can assist in achieving funding support for a new or expanded facility.

As a first step in achieving new or expanded facilities - to replace crowded and outdated buildings - we examine community needs, police service strategies, demographics and crime rates, staffing requirements, space needs and site selection criteria.

- Bronxville Police Department	current
- Kingston Police, Ontario	2001
- Liberty City Hall & Police, Missouri	2001
- Ossining/Briarcliff Manor Police, New York*	2001
